MERT KANDEMİR

SOFTWARE DEVELOPER | ERP & MANUFACTURING SYSTEMS | .NET

CANIAS ERP (PRD) • TROIA • C# / ASP.NET Core • SQL • Next.js • Industrial Software

İzmir, Türkiye • +90 506 591 3965 • mertkandemir01@gmail.com • linkedin.com/in/mert-kandemir-8798bb8b

PROFESSIONAL SUMMARY

Software developer with 4+ years of CANIAS ERP Production (PRD) experience, focused on ERP and manufacturing systems. Translates manufacturing requirements into application, data and reporting solutions across standard-product development and customer-specific implementations. Combines enterprise ERP domain expertise with modern .NET product delivery, demonstrated by a three-month Hyundai assignment in South Korea and the independent frontend/backend development of Carbon0Pulse.

4+ YEARS	3 MONTHS	WORKING PRODUCT
CANIAS ERP Production	South Korea • Hyundai	Carbon0Pulse • .NET

PROFESSIONAL EXPERIENCE

Software Specialist | IAS - Industrial Application Software

May 2023 - Present

İzmir, Türkiye

- Develops and improves standard CANIAS ERP Production (PRD) functionality used across multiple customer environments, covering business logic, databases, user interfaces, reporting, performance and maintainability.
- Translates requirements across production orders, BOM, routings, material requirements and reservations, production confirmations and Production Management into reusable standard functionality or customer-specific solutions.
- Owns work across the software lifecycle, from process analysis and technical design through implementation, debugging, testing, deployment and production support.

SELECTED PROJECT | Hyundai Automotive Manufacturing

- Develops Production Management applications and production reports as part of the team supporting end-to-end vehicle manufacturing.
- Selected for a three-month on-site assignment in South Korea, working directly with local business and technical teams; continued development and support remotely after returning to Türkiye.
- Translated shop-floor requirements into application business logic, reporting and database solutions.

Junior Software Specialist | IAS - Industrial Application Software

May 2022 - May 2023

İzmir, Türkiye

- Built standard-product improvements and customer-specific solutions with TROIA and SQL, contributing to testing, debugging and live production issue resolution.
- Promoted to Software Specialist after approximately one year.

Software Engineer | Geotek Electric Automation

Jan 2021 - May 2022

İzmir, Türkiye

- Designed and delivered a C# WinForms application for the Mitsubishi Electric manufacturing facility in Manisa; the solution remains in operational use.
- Developed a C# background application and web application for the Philip Morris manufacturing facility in Torbalı to support automated monitoring and counting of production and packaging outputs.
- Handled integration, testing, commissioning, troubleshooting and on-site support across HMI/SCADA, PLC and manufacturing systems.

INDEPENDENT PRODUCT

Carbon0Pulse | Carbon Emission Measurement & Reporting Platform

Independent Product Developer | Working Product - Ready for Customer-Hosted Deployment

ASP.NET CORE	NEXT.JS	CUSTOMER-HOSTED
Layered backend	Standalone frontend	Deployment ready

- Independently developed the product's frontend and backend for carbon-emission measurement, calculation, tracking and reporting, owning requirements, architecture, data modeling, business logic, testing and deployment preparation.
- Built the ASP.NET Core backend using separated API, Application, Domain, Infrastructure and Shared layers, together with a standalone Next.js frontend.
- Implemented data-processing, emissions-calculation and reporting workflows and prepared the product to run within customer-managed infrastructure.

TECHNICAL EXPERTISE

Primary expertise: CANIAS ERP Production (PRD), TROIA, SQL, manufacturing systems and process analysis

.NET & product development: C#, ASP.NET Core, REST APIs, layered architecture, data modeling and Git

Web: Next.js, decoupled frontend/backend systems, SaaS and customer-hosted deployment architectures

Industrial systems: WinForms, HMI/SCADA, PLC, shop-floor applications and manufacturing integrations

EARLY CAREER EXPERIENCE

Software Specialist | Dinçer Teknoloji Güvenlik Yazılım A.Ş.

Jan 2020 - Jun 2020

İzmir, Türkiye

- Performed SQL and database development for personnel attendance and physical access-control systems, supporting maintenance and troubleshooting of turnstile-integrated applications.

Freelance Software Developer | Part-time

Sep 2016 - Jan 2021

İzmir, Türkiye

- Worked on a project basis on small-scale software development, database design, reporting and automation solutions.

EDUCATION & PROFESSIONAL DEVELOPMENT

İzmir University | Faculty of Arts and Sciences - Mathematics and Computer Sciences | 2011 - 2016

Bilge Adam | .NET Specialization Program

English: Professional working proficiency | Three-month on-site assignment in South Korea • Stafford House, Brighton
